

This book contains detailed instructions on building the AH-1Z Viper 1/35 scale model aircraft from Academy (Kit 12127).

In addition to the kit's instructions, the book also includes Eduard's BIGED set 33111 which includes 32961, 33243, and JX242. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Academy along with the Eduard AM sets and break them up into individual steps.

The aftermarket steps are colored gray making them easy to skip if you just have the basic model. This book also provides a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 573 steps and 118 plus figures over 142 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Academy or AM) along with a block to mark that you completed the step.

There are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I hope you find this book useful. See a multi-page sample along with photos of finished models and other books at glennhoovermodels.com.

AH-1Z Viper Model: How to build the AH-1Z Viper Model from Academy (A Glenn Hoover Model

Build Instruction Series)
